## Summary

Full-Stack Developer with 4+ years building scalable web applications using **Laravel**, **Node.js**, **React**, and **AWS**. Expanding expertise into **Go microservices** and **gRPC-based distributed systems**. Proficient in **RESTful API development**, **microservices architecture**, **CI/CD pipelines**, and **database design (MySQL, PostgreSQL, MongoDB)**. Successfully integrated **payment gateways** processing **\$500K+ in transactions** and achieved **85%+ test coverage** across production systems. Active **open-source contributor** to Laravel ecosystem.

## Technical Skills

- Languages:** JavaScript, TypeScript, PHP, Go, HTML5, CSS3, SQL
- Frameworks and Libraries:** Laravel, React.js, Next.js, Node.js, Express.js, Vue.js, jQuery, Bootstrap, Tailwind CSS, Prisma
- Databases:** MySQL, PostgreSQL, MongoDB, Redis
- Cloud and DevOps:** AWS (EC2, S3, RDS, Lambda), Docker, CI/CD, GitHub Actions, Git, Linux
- Testing and Quality:** PHPUnit, Pest, Cypress, Jest, Unit Testing, E2E Testing, Test-Driven Development
- APIs and Integration:** RESTful APIs, gRPC, Protocol Buffers, Stripe API, Razorpay API, Socket.io, Elasticsearch, OpenTelemetry

## Experience

<b>Vivansh infotech</b> Software Developer	June 2024 – Present Ahmedabad, Gujarat
<ul style="list-style-type: none"><li>Optimized <b>REST APIs</b> using <b>Node.js</b> and <b>Laravel</b>, reducing response time by <b>25%</b> through query optimization and caching.</li><li>Enhanced <b>CI/CD pipeline</b> with <b>Docker</b> and <b>GitHub Actions</b>, reducing deployment time by <b>40%</b> and resolving <b>15+ critical bugs</b>.</li><li>Improved sprint velocity by <b>20%</b> through comprehensive code reviews and testing protocols.</li></ul>	
<b>Yudiz Solutions Limited</b> Web Developer	Jan 2022 – May 2024 Ahmedabad, Gujarat
<ul style="list-style-type: none"><li>Engineered <b>10+ full-stack applications</b> using <b>Laravel</b>, <b>Node.js</b>, and <b>MySQL</b>, serving <b>50,000+ users</b> with <b>20+ API integrations</b>.</li><li>Managed <b>AWS infrastructure (EC2, S3, RDS, Lambda)</b> achieving <b>99.9% uptime</b> and reducing hosting costs by <b>15%</b>.</li><li>Integrated <b>payment gateways (Stripe, Razorpay)</b>, processing <b>\$500K+ in transactions</b> with zero security incidents.</li><li>Implemented <b>CI/CD pipelines</b> and <b>testing framework (Pest, PHPUnit, Jest)</b> achieving <b>85%+ coverage</b>, reducing bugs by <b>40%</b>.</li></ul>	
<b>Adore India</b> Software Engineer Intern	May 2021 – Aug 2021 Kolkata, West Bengal
<ul style="list-style-type: none"><li>Developed backend and frontend features using <b>Laravel</b> and <b>React.js</b>, delivering 4 key modules.</li><li>Led team interactions with clients for requirement gathering and project delivery.</li></ul>	

## Projects

<b>PulseCheck</b>	Dec 2024 – Present
<ul style="list-style-type: none"><li><b>Technologies:</b> Go, gRPC, Protocol Buffers, PostgreSQL, Docker, OpenTelemetry, Jaeger</li><li>Built <b>distributed URL monitoring system</b> using <b>Go microservices architecture</b> with <b>gRPC</b> for inter-service communication and <b>PostgreSQL</b> for persistence.</li><li>Implemented <b>real-time health checks</b> with millisecond precision tracking and <b>OpenTelemetry</b> distributed tracing across services for complete observability.</li></ul>	
<b>Everflex Plus</b>	Jan 2023 – Sep 2023

- **Technologies:** Laravel, React, MySQL, AWS EC2, Pest, Cypress
- Developed **HEP and RTM healthcare system** serving **500+ therapists** and **3,000+ patients** with **95% test coverage** and **99.8% uptime**.
- Achieved **30% increase in therapist-patient interactions** and **45% lead generation growth** through automated workflows and email marketing.

### Fidali

Oct 2022 – Mar 2023

- **Technologies:** Laravel, Vue.js, MySQL, Stripe API, AWS S3, Docker
- Built **Airbnb-style rental platform** with **200+ listings**, **1,000+ users**, handling **500+ monthly reservations** and processing **\$50K+ monthly**.
- Developed secure booking system with **Stripe payments**, **Laravel Queues**, and analytics dashboard for property owners.

### Business Network

Apr 2022 – Aug 2022

- **Technologies:** Node.js, React, MongoDB, Socket.io, Elasticsearch
- Built **LinkedIn-style platform** for **800+ professionals** with **real-time messaging**, **Elasticsearch search**, and recommendations increasing engagement by **40%**.

### Fleet Mart

Nov 2021 – Feb 2022

- **Technologies:** Laravel, jQuery, MySQL, Razorpay API, Bootstrap, JWT
- Created **vehicle marketplace** with **300+ listings**, **500+ users**, admin approval system reducing fraud by **90%**, and **35% higher conversion**.

## Open-Source Contributions

---

- **Merged PR in Laravel React Starter Kit:** Fixed **TypeScript form handling issues** in `useForm`, improving API consistency and preventing missing fields. Merged by **Taylor Otwell**.
  - **PR Link:** GitHub PR #46
- **Mobile-Responsive Drawer Component:** Designed and implemented a **responsive drawer component** enhancing mobile navigation UX, receiving positive review from **@tnylea** and **community feedback** for improved mobile experience.
  - **PR Link:** GitHub PR #57 (Closed with positive feedback)

## Certifications and Achievements

---

- **Open-Source Contributor:** Merged pull requests in Laravel React Starter Kit (2024), recognized by Taylor Otwell
- **Test-Driven Development:** Achieved 95% test coverage using PHPUnit, Pest, Cypress, and Jest across production applications

## Education

---

### Gujarat Technological University

June 2018 - June 2022

*Bachelor of COMPUTER ENGINEERING (CGPA: 8.65 / 10.00)*

Mehsana, Gujarat
